2014 Participation Program Status: Good Standing			

Note: Reflects data as of March 2015; rates may change if 2014 testing is not complete.

* *Double Selection:* When a Participant's first and defective samples exceed 20% of the annual testing obligation. Additional samples shall be secured for each model selected for test (refer to Section 9.15 of the AHR I General OM).

Probation Mode: The number of involuntary re-rates within a program year exceed the criteria listed in Table 6. Additional samples shall be secured for each model selected for test and private test reports are required prior to listing any new BMG (refer to Section 9.15 of the AHR I General OM).

Penalty Mode: The number of involuntary re-rates within a program year exceed the criteria in listed in Table 6. The number of annual tests shall be doubled, additional samples shall be secured for each model selected for test, and testing is required through AHR I prior to listing any new BMG. Also, a monetary penalty is incurred per additional re-rate (refer to Section 9.15 of the AHR I General OM).
